

10th February 2020

Dear Sir,

**INVITATION TO ATTEND WORKSHOP ON STRUCTURAL ENGINEERING SOFTWARE
AT THE GHANA INSTITUTION OF ENGINEERING CENTRE.**

MIDAS IT in collaboration with Associated Consultants Limited and the Ghana Institution of Engineering is organizing a one-day workshop for civil engineers in the Structural Engineering practice. This workshop will be held from **on 26th and 27th February 2020** for two batches of attendants. Each participant will get 7 CPD points in accordance with requirements of GhIE.

MIDAS IT is a very reputable Global Information Technology Company and a world leader in providing engineering solutions with its headquarters in the MIDAS IT Tower, South Korea and its software has been used widely in the design of most high-rise structures in Korea, Middle East, Dubai, Malaysia and currently in Ghana etc and are touted by industry leaders to be user friendly.

In view of the advancement in civil structural and geotechnical engineering, it is important that engineers use the current knowledge available in the industry using appropriate software. It is in line with this that, we are currently distributing this suite of software in Ghana and providing "hands on" training in their use while educating engineers in the theory behind their development.

You are therefore specially invited to participate in this one- day program to gain state of the art knowledge in Building Designs including seismic loading. The cost of this training will be free, however a token amount of **GH¢200.00** will be paid on the day of the workshop to cater for meals and venue.

Yours Faithfully,

Ing. Kwabena Bempong
